

What is Luxury Vinyl Tile?

Luxury Vinyl Tile (LVT)

is composed of PVC vinyl layers, a realistic 3D photo layer, and an extremely durable protective layer. It's made to look like wood or stone, so there are a lot of options to choose from. Unlike Vinyl sheeting, Luxury Vinyl Tile comes in tile or planks that are easy to install and replace.

LVT's thin "protective wear layer" must be cleaned & maintained to prevent damage. Regular use of products in the Maxim® LVT Floor Care line will cover all LVT maintenance needs.

Why Luxury Vinyl Tile?

- ✓ Stylish design options
- ✓ Eliminates high cost of stripping & burnishing
- ✓ Lower installation costs
- ✓ Lower maintenance
- ✓ Mimics more expensive flooring at a lower price
